

Become a data-driven story teller.

The Artemis Platform is more than just a data warehouse. It's a set of tools, we call them "apps", that empower you to monitor all your clients' data, proactively track employee engagement, and hold vendors accountable.

Before you recommend one more wellness program, or plan another design change, be sure your client has the Artemis Platform.

What sets us apart from the rest?

We're easy to use.

Our simple and straight-forward interface gives you a clear picture of your clients' benefits programs.

Get actually-actionable data.

This isn't code for "we have charts"! We surface problems and solutions you can actually do something about.

Have all the data. Like all of it.

From disability, to wellness, and everything in between, we give you access to all your clients' benefit data. All in one place.

We give you unlimited users.

We let you share the right data with the right people with no restrictions. For free.

We're fast and flexible.

We integrate with virtually any data set, and provide lightning-fast queries times.

Easily share insights.

Find something good for one client? Simply click a button to share it with the rest of your clients.
