

The Artemis Community: Your Connection with Benefits Innovators

When you partner with Artemis, you're not just accessing a fast, flexible tool for data analytics. You're also joining a movement to optimize employee benefits and improve healthcare for your members.

What is the Artemis Community?

It's an online forum for Artemis clients to ask questions, access tutorials, suggest new features, and get insights into Artemis. You'll find how-to guides, FAQs, helpful materials, and discussions with other Artemis users to ensure your success.

- **Collaborate:** Connect with other Artemis clients and analytic experts to answer tough questions.
- **Share:** Ask questions, share your experiences, and add value to discussions.
- **Explore:** Dive deeper into platform tips and tricks, and share your product feedback.

Who is participating?

The Artemis analytics team and Artemis clients will use the Community to connect on benefits challenges, hot topics, and industry insights. Think of it like a perpetual online client conference; you can keep the conversation going with other experts and innovators like you.

Why is this valuable?

The Artemis Community is an organic "knowledge center" that will be informative for clients, plus it will provide opportunities for you to shape the future of Artemis.

You'll be able to collaborate with other users, chat with Artemis experts, and help shape the future of the Artemis Platform. We want your input on upcoming product features, our Product Roadmap, new releases, and more.

We're committed to building our product with benefits leaders in mind, and we can only do it with your help.
